PMG Digital Business Platform

The Digital Business Platform with Process Automation for the Bold Enterprise

PMG believes that great companies should focus on driving value to customers rather than fighting internal processes. Bold businesses are finding ways to innovate digital transformation through collaboration between IT and business areas, and process orchestration that automates, drives efficiency, and results in better business outcomes.

The PMG Digital Business Platform provides business process automation via best of breed BPM technology, including an optimized user experience, powerful workflow engine, multi-point integration capabilities, and analytical reports and dashboards.

Leveraging our configurable low-code platform, we rapidly build business solutions tailored to your specific needs, providing value in a matter of weeks.

The PMG Digital Business Platform is a better alternative to large scale, complicated BPM solutions that are overly expensive and time consuming to implement. Yet, it’s far more robust than the lower priced, simplistic BPM alternatives that can’t handle complex business processes.

PMG AUTOMATES BUSINESS PROCESSES THROUGHOUT THE ENTERPRISE

Human Resource Management

- Automation and provisioning for employee/contractor onboarding/off-boarding, add/move/change processes
- Full integration into HR, IDM and ERP systems

Identity Access Management

- Mature Role Based Access Control (RBAC), user provisioning, rights, roles, entitlements and privileges management

Infrastructure Management

- Automated provisioning and management of virtual servers, load balancers and firewalls
- Role based governance

Product Lifecycle Management

- Integration to external systems/data sources for materials, scheduling and production resources

Digital Marketing Infrastructure Management

- Provisioning and maintenance of digital marketing assets from websites to mobile apps, along with associated tasks pertaining to domains, DNS configuration, analytics, etc.

ABOUT PMG

The Global 2000 rely on PMG to deploy software solutions that streamline operations, reduce costs and improve efficiency. Our solutions give business and IT professionals a smarter way to automate business processes and improve collaboration. Ranging from IT financial management to identity management, employee onboarding and cloud provisioning, PMG’s technology is quickly deployed and easily supports constantly evolving business needs.

WHY SHOULD YOU CHOOSE THE PMG DIGITAL BUSINESS PLATFORM?

Low-Code Configuration – Implement complex and dynamic processes with easy drag and drop workflow actions and configurable properties.

User Experience – Intuitive for end users, with little to no training required.

Integration – Prepackaged connector kits and generic connector actions easily integrate to existing enterprise systems.

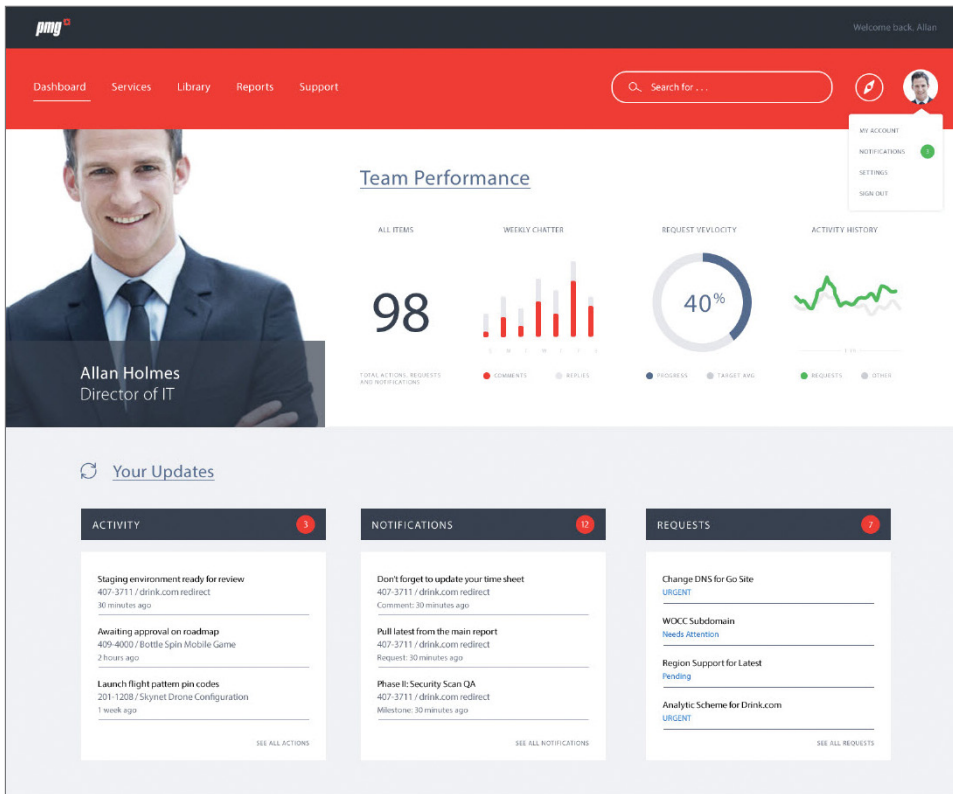

Built-to-Change – Easily updated to accommodate changes in day-to-day business processes.

Mobile – Responsive design and access from any device.

Fast Deployment – Our IGNITION implementation process ensures quick deployment.

Flexible Deployment – Options for On-Premise or dedicated SaaS solution.

Expansion – Leverage capabilities throughout the enterprise without the need for additional modules.

The PMG Digital Business Platform Dashboard

With a proven track record of success, PMG boasts successful deployments representing a wide array of industries worldwide. Leaders such as CVS, Kraft Foods, Comcast, Textron, Analog Devices, Inc., – and many more – rely on PMG. You should, too.
